

Environmental Policy

Lahood Window Furnishings is committed to actively working to achieve the following:

- 1) Protecting the environment and preventing pollution related to its activities.
- 2) Complying with all applicable NZ Health, Safety and Environmental legislation.
- 3) Continually improving our performance relating to the above.

To achieve this all a company-wide focus is required and so we have key-performance indicators against 1 to 3

Our method to achieve the desired outcomes is:

- Regularly (at a minimum annually) assess our activities and their effects upon the environment in a systematic and logical fashion.
- Identify the actions we need to take to address each effect.
- Set targets based on the actions we need to take.
- Monitor (normally bi-monthly) our progress on each target

The key points of its strategy to achieve this are:

- Minimise waste by evaluating operations and ensuring they are as efficient as possible.
- Actively promote recycling both internally and amongst its customers and suppliers.
- Source and promote a product range to minimise the environmental impact of both production and distribution.
- Meet or exceed all the environmental legislation that relates to the Company.
